ASSET High Level Policy Forum in Brussels

Thursday, March 12, 2015 - 10:15

Tackling pandemics and epidemics is an intricate process, which necessitates effective interaction among many stakeholders. As this interaction must happen very quickly and under

intense public scrutiny, preparedness is essential. The network of stakeholders can only be prepared well through building trust and good working relationships prior to the incident. In addition, identifying and discussing important policy issues and examining how they can be improved, can only be done comprehensively through considering the points of view of all the main stakeholders.

Third International Digital Disease Detection Conference

Thursday, May 21, 2015 (All day)

The ability to rapidly recognize and respond to both global and local health threats remains a critical public health priority. The ever-growing digital world represents an unprecedented opportunity to harvest for new solutions and tools to face these emergencies. This digital means of disease detection has been made possible by the growing influence of Internet technology, which has significantly changed the landscape of public health surveillance and epidemic intelligence gathering.
